SMART LEARNER™*
Provides optimal storage algorithm based on usage pattern analysis

*After opened 10 minutes continuously. #Smart Learner operation controlled and monitored only in LG ThinQ™ App.

Smart Connectivity

Smart Learner™

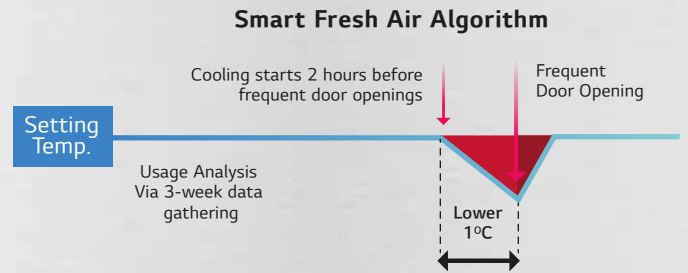

Your refrigerator just got a lot smarter with Smart Learner™.

LG's Smart Learning Technology learns your pattern for over three weeks. Then it optimizes everything from energy and cooling performance to energy consumption as per your usage.

Smart Fresh Air

Applies algorithm to analyse usage pattern and optimises temperature.

Smart Fresh Air minimizes the rise in inner temperature with the help of intensive cooling logic just two hours before user's frequent door opening time. It does so by accumulating data on hourly, daily, and weekly basis.

ALL NEW LG Frost-Free Refrigerator

Freshness & Cooling

Seals-in farm freshness for long.

Freshness

Hygiene Fresh+™

Keeps your refrigerator free of bacteria and odors.

Introducing Hygiene Fresh, a powerful air filter that removes up to 99.99%* bacteria. What's more! It also deodorizes and purifies the air inside the refrigerator.

What is Hygiene Fresh+™ ?

LG Hygiene Fresh+™ filter is unparalleled in removing bacteria and odors from LG refrigerators. The powerful filter removes up to 99.99%* of bacteria, while at the same time it cleans the internal air ensuring that the food stays fresh and hygienic.

Hygiene Fresh

*Bacteria: Staphylococcus aureus, Escherichia coli, Listeria monocytogenes, Klebsiella pneumonia
Confirmed by TÜV Rheinland on all processes and results, the test method referring to the ASTM E2149 test protocol.
Their bacterial removal performance is that the number of bacteria was counted before and after an hour (1hr) reaction wherein fractions (1.0g) of the filter were put into the 50ml diluted bacterial solution. Results may vary in real use conditions.

Freshness

DoorCooling⁺™

Delivers freshness evenly & faster.

Food stays fresh and drinks get ice-cold on any shelf with even and faster cooling performance.

What is DoorCooling⁺™ ?

LG's exclusive DoorCooling⁺™ technology cools 35%* faster than a conventional cooling system. As the cold air spreads evenly across the machine, it gives you fresher food and colder beverages on every shelf.

*Based on UL test results using LG's internal testing method comparing time for the temperature of the water container placed in the top basket to drop between Door Cooling⁺™ and Non-Door Cooling+ models. Applicable models only. The images of the product are for illustration purposes only and may differ from the actual product. Door Cooling⁺™ is supposed to stop when the door is opened.

DoorCooling⁺™ for Everyone.

All new LG Frost-Free Refrigerators are designed for everyone. Be it the drink of the youngest of the family or the beverage for the eldest, the DoorCooling⁺™ technology keeps everything evenly cool.

CHILDREN

Children like to play all day, and when they get tired, simply cool them off with a cold beverage.

YOUNGSTERS

Lukewarm beverages bring down the energy of a party. Get ice-cold beverages anytime and get that party going.

MOTHER

Don't hesitate while keeping food at the side door. DoorCooling⁺™ provides cold air evenly, everywhere.

FATHER

After a hectic workday or while watching soccer on TV, get your ice-cold beverage immediately.

Freshness

Fresh 0 Zone

Start cooking without unnecessary defrosting.

It provides optimum temperature to vegetables, fish & meat and maintains freshness for a long time.

Fresh 0 Zone	Average temp at -0.5°C
Food	Storage Temp. ($^{\circ}\text{C}$)
Meat	-2.2~0
Seafood	-0.5~1.1

Fresh 0 Zone provides the ideal atmosphere to store food without having to freeze them.

The cover in the front and the direct air vent from the back can maintain a lower temperature than the other fridge compartments. So that you can cook fresh vegetables, fish & meat with Fresh 0 Zone, anytime.

ALL NEW LG Frost-Free Refrigerator

Convenience

Intuitive user experience that elevates your elegance and your lifestyle.

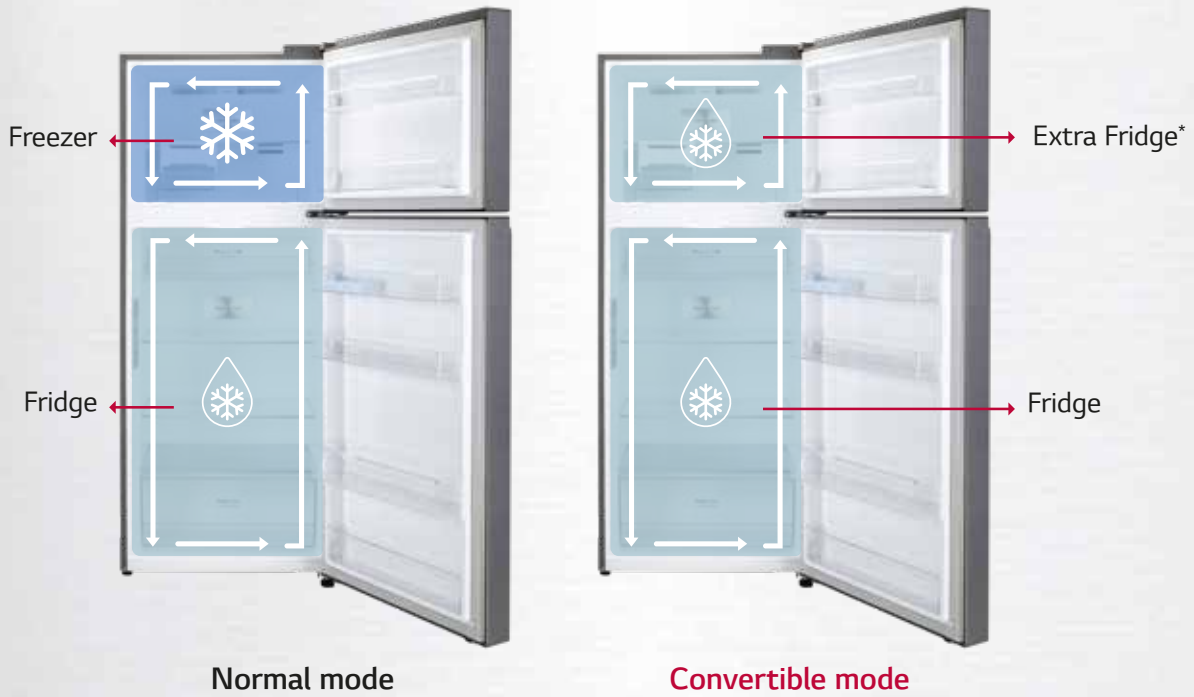

Convenience

Convertible

Store more food with LG Convertible mode.

In India, most of the time, the fridge is stuffed with both cooked and raw food, while the freezer remains unoccupied. Now, you can use the freezer as a fridge and keep your food and vegetables fresh by converting the freezer into a fridge.

Convenience

Movable Ice Maker

Exceptional ice maker with easy functionality.

LG Frost-Free Refrigerator's Top Freezer has a detachable & sliding ice maker. So, now you can adjust the ice maker to make more space in the refrigerator or take it out entirely.

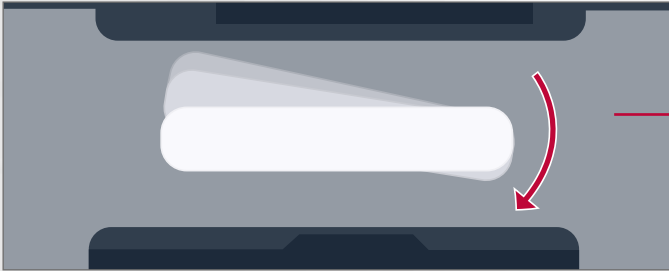

Detach Ice Tray

Easily detach ice maker to store your favourite food.

Twist It Easily

Twist the ice maker with just 1 finger.

Ice Container

Left with extra ice? Don't worry! It has its own container to store ice.

Convenience

Pull-out Tray

Now even the innermost area is accessible.

Pull-out tray slides out to bring the innermost area within our reach.

ALL NEW LG Frost-Free Refrigerator

Energy Saving

Smart Inverter Compressor™
from the leaders of energy saving.

Energy Saving

Smart Inverter Compressor™

Energy efficient & long-lasting

LG's Smart Inverter Compressor™ has taken energy efficiency to a whole new level, now you can save both money & the planet.

It cools the machine based on the load inside the refrigerator. While conventional compressors always work at high capacity, the LG Smart Inverter Compressor™ checks the actual demand to supply the optimal level of cooling to save energy and keep food fresh.
